

June 13, 2012

Thank you to everyone that took the time to call their legislators to stop Senator Durbin's Amendment that would have placed unnecessary and expensive regulations on responsible supplement companies and ultimately, our ability to access them.

Because of the voice of the American people, in harmony with the Natural Products Industry working together, we can celebrate another victory in protecting our right to access quality vitamins, minerals and herbs without being hindered by unjust regulations. Thank you to Senator Tom Harkin for calling for a vote to table this amendment; the final vote was 77-20. Bravo to everyone for being active to protect our freedom!

As a nation, we must stay vigilant and know that this victory does not ensure our future for health freedom. As consumers learn about the power of quality supplements and our ability to heal our selves, the forces that financially oppose this liberty will continue to interfere with our rights.

Let us all continue our work as one voice!

Blessings and peace, Claudia
